

Are you the father of a child or young person with a disability?

WE'D LIKE TO KNOW WHAT YOU THINK. PLEASE READ ON...

WHAT IS THIS ALL ABOUT?

Monash University and the Cerebral Palsy Education Centre are conducting research to explore the experiences, health, wellbeing and needs of fathers caring for a child/young person with a disability. Participation means that you will complete a short anonymous online survey. The results will assist in the development of services that better support fathers of children/young people with a disability, and improved understanding for health professionals about the health and life situation of fathers.

OK I AM INTERESTED ...

You are invited to participate if you are a father of a child/young person with a disability living in Australia. Participation is confidential and fathers will not be identified in any reports from the study.
