## NDIS for Children Aged 0-6 Years

The Early Childhood Early Intervention (ECEI) approach supports children aged 0-6 years who have a developmental delay or disability and their families/carers. The ECEI approach supports families to make informed choices about available services and supports to get the best outcomes for their child.

**Link Health and Community** is the community partner delivering ECEI services for children aged 0-6 across Inner and Outer Eastern Melbourne and Inner Gippsland for the National Disability Insurance Scheme (NDIS).

Link Health and Community will deliver an information session for families/carers covering the following topics:

- What is NDIS ECEI?
- Benefits of ECEI approach
- What is developmental delay?
- What should I do if my child has a developmental delay?
- The ECEI pathway
- Getting ready to meet with Link Health and Community
- Getting an NDIS plan
- About Link Health and Community and connecting with Link Health and Community

This information session is offered in partnership with Knox City Council. If you have any queries, please contact:

Saskia Weerheim  
Municipal Disability Project Officer – Early Years Support  
Knox City Council
